EDUCATION

B.E. in Computer Engineering, Lebanese American University (LAU)	Sep. 2024 – May 2028 (Expected)
Merit Scholarship Recipient	CGPA: 4.0/4.0
SAT Score: 1510	
Ranked 1st among 269 students in Grade 12	
B.S. in Electronics (Double Major), Lebanese University	Sep. 2024 – May 2027 (Expected)
Ranked in the Top 15% of the cohort	

EXPERIENCE

AI Automation Engineer Intern – ARK Energy	2025 – Present
- Built AI-powered automation systems for document understanding, compliance checking, and structured report generation using LLM-based workflows and RAG. - Engineered end-to-end pipelines for PDF and Excel processing, including ingestion, parsing, chunking, embeddings, retrieval, and response generation. - Designed retrieval and storage systems using PostgreSQL and pgvector for vector search, traceability, and structured outputs. - Built and automated workflows using n8n, integrating APIs and AI services to reduce manual effort and streamline processes.	

RESEARCH & PROJECTS

AURA: Augmented University Reality Assistant – Vertical Integrated Project, LAU	Aug. 2025 – Present
- Developed a multi-agent AI system using LangGraph for content generation, Q&A, and contextual retrieval. - Built a modular microservice architecture using FastAPI and WebSockets for real-time communication. - Integrated multimodal components including speech-to-text and computer vision into a unified assistant system.	
ML-Driven WEF E Stress Index & Early-Warning System – Research Paper	Aug. 2025 – Present
- Developed machine learning models including Linear Regression and Random Forest for environmental stress prediction. - Built a data pipeline integrating satellite-based features (NDVI, NDTI, rainfall, VIIRS) to construct a composite WEF E index.	

LEADERSHIP & AWARDS

AI Club – IEEE LAU Student Branch, Vice President	2024 – Present
Led technical workshops and AI-focused sessions promoting hands-on system-building skills.	
Leader, Secretary, and Treasurer – Lebanon Scouts	2018 – Present
Managed a team of 40 members, including planning, execution, budgeting, and logistics.	
IEEE Xtreme 18.0 – 8th in Lebanon	Sep. 2024 – Nov. 2024
Ranked 8th in Lebanon in a global competitive programming contest.	

SKILLS

Languages	Arabic (Native), English (C1), French (C1)
Programming	Python, Java, JavaScript, SQL, Git, GitHub
Backend & APIs	FastAPI, REST APIs, WebSockets, Microservices
Automation Tools	n8n
Databases	PostgreSQL, Prisma, pgvector, Vector Databases
LLM & AI Systems	RAG Systems, AI Agents, LangGraph, OpenAI API
Developer Tools	Claude Code, OpenAI Codex, AI-Assisted Workflows
Systems	Data Pipelines, System Integration, Debugging
Soft Skills	Leadership, Teamwork, Communication, Event Planning
