MOUAZ AMOUD

+961 70 278 619 | Byblos, Lebanon | mouaz.amoud@lau.edu | LinkedIn | IEEE Member No. 100592028

EDUCATION

B.E. in Computer Engineering, Lebanese American University (LAU) Sep. 2024 – May 2028 (Expected)
Merit Scholarship Recipient CGPA: 4.0/4.0
Relevant Coursework: Data Structures & Algorithms SAT: 1510

B.S. in Electronics (Double Major), Lebanese University Sep. 2024 – May 2027 (Expected)
Ranked in the Top 5% of the cohort

EXPERIENCE

AI & IoT Solutions Engineer Intern – Interphase Jul. 2026 – Aug. 2026

- Built pipelines linking IoT cameras and devices to computer-vision inference and automated workflows.
- Developed Python/FastAPI services for device communication and data processing as reusable integration layers.

AI Automation Engineer Intern – ARK Energy Dec. 2025 – May 2026

- Built RAG pipelines for PDF/Excel documents (parsing, chunking, embeddings, retrieval, cited answers) that automated compliance checks and reporting, cutting a 3-day manual process to about 1 hour.
- Designed a PostgreSQL/pgvector retrieval layer with pluggable vector stores and configurable chunking.

Research Assistant, Wireless Communications – Dr. Chadi Abou Rjeily, LAU Aug. 2026 – Present

- Analyzing outage probability of full-power, hybrid-powered, and energy-harvesting relay systems.
- Developing MATLAB simulations to validate theoretical results and compare relay strategies and placements.

Teaching Assistant & Chair Department Assistant – LAU Sep. 2025 – Present

- University-appointed tutor for Circuits and Calculus, running one-on-one and group sessions.
- Chair Department Assistant (since Sep. 2026): reviewing Final Year Project reports against requirements.

PROJECTS

AURA: Augmented University Reality Assistant – LAU Aug. 2025 – May 2026

- Built a multi-agent "AI professor" in LangGraph (lecture, Q&A, slides, RAG) with WebSocket streaming.
- Integrated Whisper speech-to-text and computer vision (hand-raise detection, attendance) via FastAPI.

ML-Driven WEFE Stress Early-Warning System Aug. 2025 – Dec. 2025

- Built a satellite-data pipeline (NDVI, NDTI, rainfall, VIIRS) and Random Forest models for stress forecasting.

AWARDS

Synopsys International Microelectronics Olympiad – 2nd Place in Lebanon 2026
IEEEXtreme 18.0 – 8th in Lebanon (24-hour global competitive programming contest) 2024

LEADERSHIP

Vice President, AI Club – IEEE LAU Student Branch 2024 – Present

- Led AI workshops and co-organized the IEEE MENACOMM 2025 conference (about 100 attendees).

Engineering School Representative – LAU Student Council 2026 – 2027

- Elected by direct student vote with 272 votes, securing one of three Engineering School Representative seats.
- Represent students in council discussions and decisions, advocating for their academic and campus-life concerns.

Leader, Secretary, and Treasurer – Lebanon Scouts 2018 – Present

- Lead a 40-member group and manage budgeting, financial records, logistics, and earned the Wood Badge 2026

SKILLS

Programming	Python, C++, Java, JavaScript, SQL, MATLAB
AI & ML	Machine Learning, Computer Vision, RAG, LLM Agents, LangGraph, OpenAI API
Backend & Data	FastAPI, REST APIs, WebSockets, PostgreSQL, pgvector, Prisma, Git/GitHub
Languages	Arabic (Native), English (C1), French (C1)
